SUMMARY

The Wetsalt demosite is located at a salt factory and offers testing facilities for technologies for the sustainable desalination of sea water, surface water and waste water. Moreover, technologies can be tested to generate energy from water.

FACILITIES & EQUIPMENT

- Space for 4 companies
- From each water stream 40 m³/h is available
- 24/7 access
- Internet
- Assistance from students water technology
- Plug and play
- Permits

APPLICATIONS

- Desalination of sea water, surface water and waste water
- Generate energy from water

AVAILABLE WATER TYPES

- Sea water
- Purge
- Condensate water
- Surface water
